

Il soccorso inclusivo delle Pubbliche Assistenze Anpas Il Quaderno

PROGETTO FAST - Acceleriamo il cambiamento. Finanziato dal Ministero del Lavoro e delle Politiche Sociali ai sensi dell'art.72 del D.Lgs. 117/2017 Annualità 2020 (Rif. Avviso 2/2020)"

Benvenuti e benvenute

nel nostro libro illustrato e multisensoriale pensato per poter comunicare in modo efficace con persone con specifiche disabilità.

Immaginate di trovarvi in una situazione di emergenza e non riuscire a comunicare con chi si sta soccorrendo.

Questo progetto nasce con l'obiettivo di fornire ai volontari e alle volontarie Anpas uno strumento utile per comunicare con persone che hanno difficoltà a comprendere il linguaggio verbale, come ad esempio persone con disturbi dello spettro autistico, persone ipovedenti, persone con sordocecità o persone con disabilità uditiva (oppure, perché no, utile anche per comunicare con i bambini!).

Da sempre i volontari e le volontarie Anpas, presenti in ogni regione d'Italia, si adoperano con passione e con impegno per portare soccorso e assistenza a chiunque ne abbia bisogno.

Abbiamo lavorato affinché questo sforzo non venga mai lesa, affinché bisogni e diritti di tutti vengano soddisfatti e rispettati, affinché il nostro soccorso sia sempre inclusivo.

I concetti presenti in queste pagine sono stati pensati per offrire una valida risposta a pazienti che non possono comunicare attraverso la parola o non sono in grado di farlo a causa dello stress del momento.

Grazie alle illustrazioni e al testo braille presente in ogni scheda, ci auguriamo di fornire a tutti i volontari e le volontarie Anpas e a tutte le persone con bisogni speciali un supporto efficace nella facilitazione delle dinamiche di comunicazione in situazioni di emergenza.

Siamo convinti che la comunicazione sia un diritto fondamentale per tutti. Questo "quaderno" vuole rappresentare un passo importante di tutta Anpas verso una maggiore inclusione e accessibilità per le persone con disabilità.

"Si ringrazia la Lega del Filo d'Oro e la Fondazione Tetrabondi per aver sostenuto con la propria competenza e passione la realizzazione di questo lavoro"

"IL SOCCORSO INCLUSIVO DELLE PUBBLICHE ASSISTENZE ANPAS – IL QUADERNO"

Malossi

Per trasmettere un messaggio toccare le lettere indicate in nero e pizzicare quelle in azzurro

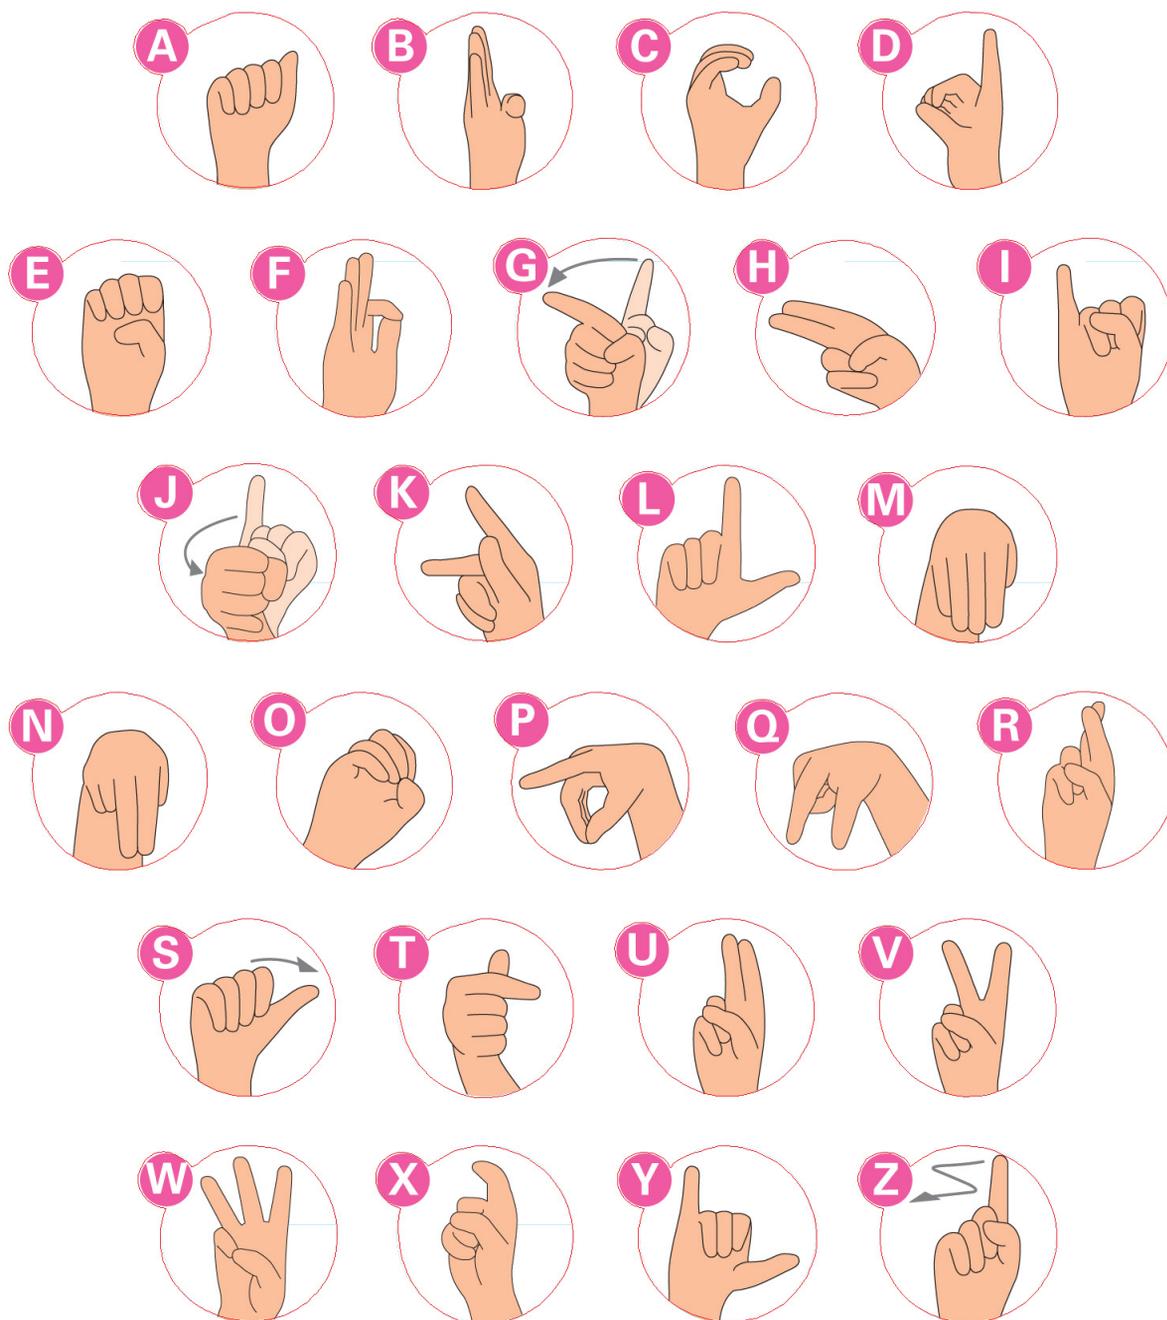

Stampatello sulla mano

Le frecce indicano la direzione e la sequenza dei tratti da eseguire al centro del palmo della mano della persona sordocieca

Dattilologia

Per trasmettere un messaggio si esegue con la mano destra (o dominante) all'altezza del viso della persona con sordocecità (se ha un residuo visivo) o tattilmente sul palmo
